

## FedDataCheck Datasheet

“Reporting features have enabled the Department to perform more in-depth analysis, resulting in cost savings to the government.”

–Treasury

“FedDataCheck has greatly improved the quality of FPDS data as well as the accuracy rate.”

–Veterans Affairs

### CURRENT SUBSCRIBERS

### IMPROVING FEDERAL PROCUREMENT METRICS PAINLESSLY

- Decrease FPDS-NG data entry errors
- Increase strategic sourcing utilization against FSSI and internal programs
- Automate the generation of the FPDS-NG V&V Exhibit II results for submission to OFPP
- Decrease competitive one bids

### WHAT ARE THE BENEFITS?

#### Instant feedback

- 105 data checks and growing — such as undefinitized contract actions that are older than 180 days and awards with multiple offers coded as not competed
- Automated email alerts and reports to contracting officers and supervisory personnel
- Online dashboards and forms documenting factors contributing to leakage and one bids

#### Ad-hoc reporting

- Web-based reports and graphical dashboards
- Excel-based reporting allowing for enhanced analytical flexibility
- Drill-to-detail capability providing actionable information at the contracting officer level

#### Workflow automation

- Online form for collection of the annual FPDS-NG V&V data quality review as well as database driven sample generation
- Online form for defining strategic sourcing vehicles and their associated PIIDs and product or service codes

#### Get proper credit for your work

- Small business and competition data check categories allowing OSDBU and Competition Advocates to review applicable awards for accuracy
- Identify propagation errors originating from IDVs

### SPECIAL OFFER

Data quality review of competition-related data fields for FY16 for your department/agency.

**See how much your competition rate can increase via enhanced data quality.**
