Defense Health

Our scientists and medical professional experts provide superior research and development support services across the full spectrum of defense health programs.

The PotomacWave Difference

A core component of PotomacWave's identity is helping ensure the readiness, effectiveness, and survivability of our nation's warfighters. We are proud to offer cutting-edge research and development, scientific and technical, and medical support services across the defense health space to address some of the U.S. Military's most complex and critical challenges. We combine our industry-leading technical expertise and deep experience with defense health programs to tailor solutions to our clients' needs that enhance their day-to-day operations and drive mission success.

Key Considerations and Factors for Success

PotomacWave has the proven ability to manage and execute high-level defense health research and development contracts. We have worked with every service branch of the U.S. Military, and we are honored to assist with providing medically ready forces to Combatant Commands and sustaining expeditionary medical skills to optimize the Nation's trauma care delivery for casualties of war. Our highly trained personnel offer expertise in a range of skills critical to the defense health field, including combat casualty care, military operational medicine, research and development, training and education, and health data IT solutions. We are committed to leveraging our resources to deliver the best possible solutions for our clients' evolving needs.

Our Valued Customers

Client Sample Engagements

U.S. Army Medical Research and Development Command, Strategic Planning Office (SPO)

The U.S. Army Medical Research and Development Command (USAMRDC) is the Army's medical materiel developer, responsible for medical research, development, and acquisition. PotomacWave supports USAMRDC SPO by delivering a broad range of administrative, technical, and operational support and services to USAMRDC, the U.S. Army, the Department of Defense, international partners, and other Federal Agencies.

Department of Defense (DoD) and Social Security Administration (SSA), Health Data Sharing Initiative (HDSI)

Military Health System beneficiaries, including wounded warriors, apply for SSA disability benefits. PotomacWave supports this work through the HDSI by receiving, reviewing, approving/denying, and saving electronic requests for information from the SSA. We also access, assemble, quality check, and securely transmit relevant clinical information from DoD's Electronic Health Records system to SSA to satisfy requests for information for disability benefits determination.

Naval Medical Center San Diego (NMCS), Bioskills and Simulation Training Center (BSTC)

The NMCS's mission is to prepare to deploy in support of operational forces, deliver quality health services, and shape the future of the military through education, training, and research. PotomacWave supports this mission by developing and using advanced learning technologies and methodologies to improve medical education and training for healthcare teams and patients. This requires several exploratory research projects involving operationally focused medical and surgical simulation, training, and education, for which PotomacWave provides support.

Services We Provide

- ✓ Research and Development (R&D)
- ✓ Information Technology (IT) Support
- ✓ Medical Services
- ✓ Scientific and Technical Support
- ✓ Medical Simulation Technologies and Training
- ✓ Facilities, Supplies, and Equipment
- ✓ Administrative Support
