Technical Operations

Our analysts provide technical and scientific expertise to deliver situational awareness and help combat threats at home and abroad.

The PotomacWave Difference

PotomacWave is proud to offer our clients world-class subject matter expertise in support of some of the Government's most complex and critical missions. Our project leaders and employees share two key attributes: an unmatched ability to articulate complex, technical data to non-technical audiences; and a sincere passion for delivering dedicated support to drive our clients' mission success. PotomacWave believes that a "high-touch" approach and frequent and open lines of communication are an integral part of developing and sustaining an effective relationship with our clients.

Key Considerations and Factors for Success

PotomacWave leverages the firsthand experience and expertise of our deep bench of technical specialists to get the job done right. Our Strategic Communications experts work collaboratively with our subject matter experts to craft client-specific messaging leveraging relevant channels and platforms to highlight high-visibility initiatives and engage stakeholders across the country at local, state, and national levels. Our consultants offer the proven ability to thrive in high-stress, fast-paced environments that demand uninterrupted mission support. PotomacWave will deliver the right expertise at the right time to meet each of our clients' unique requirements and missions across multiple sites and client organizations.

Our Valued Customers

FEMA

Client Sample Engagements

U.S. Department of Energy (DOE), Office of Intelligence and Counterintelligence (IN)

PotomacWave provides management, organizational, and administrative support services to the DOE's IN. IN supports U.S. national security policymakers by providing timely and actionable strategic intelligence analysis, cultivating and encouraging the intelligence capabilities and contributions of DOE's technical, analytical, and research expertise applicable to the nation's most difficult technical intelligence challenges. We deliver executive-level, facility, security, and intelligence analysis support to meet IN's national security mission.

Department of the Treasury, Office of Cybersecurity and Critical Infrastructure Protection (OCCIP)

PotomacWave supports OCCIP with creating, facilitating, and implementing a cybersecurity and physical incident exercise program. Our work includes developing exercise scenarios to test key incident response processes in the context of core financial sector functions. This involves coordinating meetings with external stakeholders, drafting and tracking plans, developing exercises to test strategic coordination mechanisms and drills, serving as a facilitator during exercises, identifying and capturing lessons learned, identifying technical capabilities for testing, and developing plans and procedures to capture incident response processes.

FEMA, Federal Insurance and Mitigation Administration (FIMA), Risk Management Directorate (RMD)

PotomacWave supports FEMA's FIMA RMD with the development and implementation of an agency-wide strategy to coordinate activities that will advance the adoption and enforcement of hazard-resistant building codes and standards for FEMA programs. Our work includes strategy and implementation plan development, thought leadership, meeting facilitation, stakeholder management, policy influence, metrics development, performance management, communications, and outreach.

Services We Provide

- ✓ Executive Administrative Support
- ✓ Knowledge Management
- ✓ Media Relations
- ✓ Training and Curriculum Design
- ✓ Exercise Design
- ✓ Exercise Facilitation
- ✓ Policy Analysis and Development
- ✓ Intelligence Analysis

"The contractor supplied our program with superbly qualified, professional personnel, and we were extremely pleased with the high level of support they provided." – U.S. Army Medical Research and Materiel Command
