

Defense Health Agency (DHA) Omnibus IV

Omnibus IV is a Multiple Award (MA) Military Medical Research and Development Indefinite Delivery/Indefinite Quantity (IDIQ) contract sponsored by DHA. This contract vehicle encompasses a broad range of military Medical Research and Development (R&D) activities and services that will support the future of R&D programs at the Department of Defense (DoD). Omnibus IV has a 10-year ordering period and a \$10 billion ceiling.

Contract #: HT001122D0039
CAGE #: 4YAG9
UEI #: S5ZCFWYN4KK3
POP: 06/20/2022 – 06/19/2032
(Including Award Term Options)

PotomacWave is a SB/WOSB under
NAICS 541715 (< 1,000 employees).

Omnibus IV Market Segment 2: R&D Support Services

Omnibus IV supports a broad base of DoD requirements owners engaged in Medical R&D and related activities and provides an opportunity to procure services in four main areas, called Market Segments. **PotomacWave is a prime contract holder for Market Segment 2: R&D Support Services.** Proficiency areas that fall under R&D Support Services include, but are not limited to, administrative support services, IT support services, scientific and technical support services, facilities support services, medical services support, supplies and equipment, and logistical support services. PotomacWave has more than 7 years of experience supporting Defense Health Programs in this capacity.

Advantages of Using Omnibus IV

There are significant advantages to using Omnibus IV to meet your Medical R&D needs:

- Omnibus IV allows for small business set asides at the task order level.
- The contract vehicle offers up to 5-year longevity and ceiling capacity of \$10 billion over the 10-year ordering period (5-year base period plus 5-year option period).
- Omnibus IV improves human subjects protection compliance, as regulations are built into the contract.
- Omnibus IV is free to use, with no client-paid Contract Access Fee or contractor-paid Industrial Funding Fee.
- For awards less than \$25 million and depending on complexity, Omnibus IV can decrease acquisition time and possibility of protest. Task order awards can be made in as little as three months with no protest.
- Based on task order requirements, the contract vehicle can reduce contracting administrative burdens. Performance, cost, and schedule data can be provided via the contractor-generated Acquisition Management Intelligence (AMI) Report.

Omnibus IV has already been identified as the Medical R&D go-to vehicle for the U.S. Military, including the U.S. Army, U.S. Air Force, and U.S. Navy, as well as for DHA and its components. Questions about Omnibus IV can be emailed to dha.ncr.cod-fc.mbx.dha-acq-omnibus-iv@health.mil.
