

FEDDATACHECK

Powered By:

POTOMACwave

FedDataCheck is driving data accuracy and vendor risk transparency through improved operational efficiency, targeted automation, and enhanced accountability.

FPDS Reporting Accuracy & Error Correction

- Apply 180+ FAR -based validation rules to every FPDS transaction
- Send targeted email alerts to contracting officials with correction guidance
- Automate error correction through FedDataCheck AutoCorrect
- Monitor improvements with dashboards updated daily and monthly agency progress reports

Procurement Intelligence & Risk Monitoring

- Competitive One Bid analysis, alerts, and root cause surveys
- Section 889 flagged vendor tracking and automated alerts
- Termination and exclusion cross -check reporting
- Risk alerts for awards to vendors with tax debt, FPDS terminations, or System for Award Management (SAM) exclusions

Independent V&V Dashboard & Audit Readiness

- Auto-generated statistically valid samples for Office of Federal Procurement Policy (OFPP) required annual FPDS V&V review
- Compare FPDS records with contract files via web - based review forms
- Auto-generated Exhibit 2 reports and correction tracking
- Enable AutoCorrect to submit verified updates to FPDS

Category Management & Strategic Spend

- Identify expiring Tier 0 contracts and promote addressable Best -in-Class (BIC)/Spend Under Management (SUM) vehicles
- Track category management progress with interactive dashboards
- Send alerts for Tier 0 justifications and upcoming recompetes
- Collect data on category management intent and success

Contractor Responsibility Assessment (CRA)

- Submit to up 100 Unique Entity Identifiers (UEI) via email to receive a full vendor risk profile within 1 minute
- Analyze data from SAM, FPDS, GSA Acquisition Gateway, and more
- Includes optional auto-generated Custom Responsibility Determination Memo
- Saves an average of 30 minutes per vendor review

Compliance Dashboards & Alerts

- Small Business Coding Corrections Report
- Procurement Administrative Lead Time (PALT) benchmarking and incorrect solicitation date flagging
- Subaward compliance with Federal Funding Accountability and Transparency Act (FFATA) reporting
- Buy American Act and Trade Agreements Act Exception tracking

Federal Agencies & Departments Supported

74 FTE

Equivalent Time Savings in FY24

539K

Hours Saved Using the CRA

\$2.85B

Small Business Spend Increase via Error Correction

\$1.96B

Competition Spend Increase via Error Correction

Customer Testimonials

Innovation

"PotomacWave is a constant innovator and continuously improves the FedDataCheck program. These enhancements provide the government with greater opportunities to make sure that the GSA/PBS data stays accurate as well as identifying areas for improvement. ... By utilizing FedDataCheck GSA PBS was able to improve their FPDS reporting data accuracy rate to 99.7% in FY22."

Improved Workforce

"Furthermore, they [PotomacWave] worked closely with the VA to identify and implement underutilized features beyond the requirements of the PWS, introducing valuable tools such as the Competitive One Bid Dashboard and Category Management alerts that significantly benefited the workforce improving competition rates and category management goals."

FPDS Data Check Process

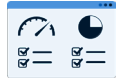

FedDataCheck downloads all new and updated FPDS transactions each night via the FPDS Atom feed.

Each FPDS transaction is scanned with 180 data validation checks looking for data inconsistencies.

When an inconsistency is identified, email notifications are sent to associated contracting officials requesting they make corrections.

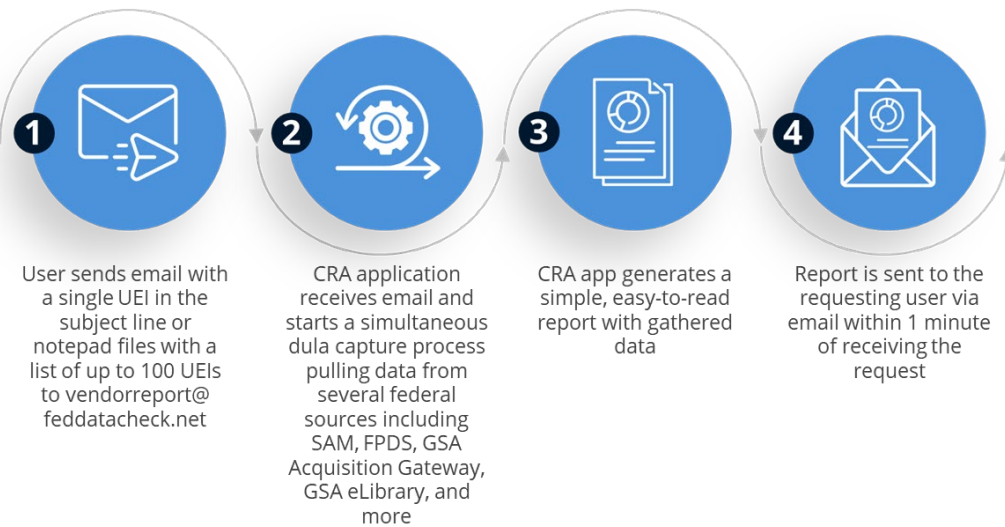

Correction status is tracked by FedDataCheck and accessible via our online reports.

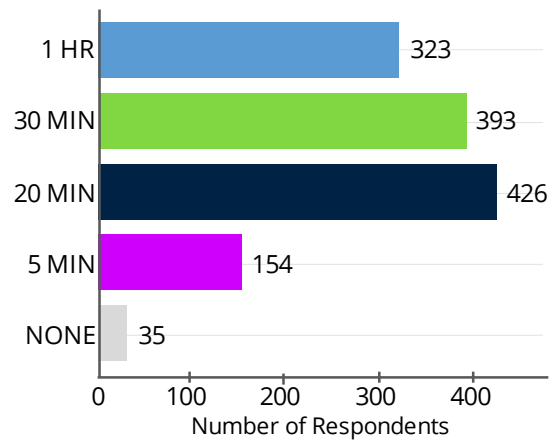

FedDataCheck's client services team meets with agency leadership monthly to walk through a comprehensive progress report detailing FPDS reporting accuracy status, review new FPDS data checks, and discuss department and federal procurement policy to ensure FedDataCheck is best positioned to provide the most value to the client.

FedDataCheck Contractor Responsibility Assessment (CRA)

Time Saved Using the CRA Tool

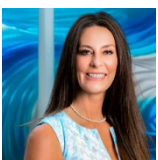

The Future of FedDataCheck

PotomacWave is embracing the potential of artificial intelligence to reimagine how data can support the federal government's mission. With a focus on innovation and impact, the FedDataCheck team is developing new AI-powered tools that build on the platform's proven foundation of automation and data integrity.

One solution currently in development is an AI-driven market research application that identifies qualified vendors and generates compliant solicitation drafts in minutes. By combining structured procurement data with intelligent insights, FedDataCheck will help agencies make faster and more informed acquisition decisions. The goal is to improve outcomes while reducing administrative burden across the procurement process.
